## OBJECTIVE

Seeks a high level of current income while preserving capital and minimizing fluctuations in share value.

## PRINCIPAL STRATEGIES

Under normal circumstances, the Fund invests primarily in high-grade corporate bonds, U.S. government securities and U.S. government agency securities. The Fund also may purchase mortgage-backed securities and asset-backed securities, and may invest in fixed-income securities that pay interest on either a fixed-rate or variable-rate basis.

## PORTFOLIO MANAGEMENT

**Morley Capital Management, Inc., Subadviser**  
Perpetua M. Phillips, CFA  
Senior Portfolio Manager

Shane Johnston, CFA  
Portfolio Manager

## IMPORTANT CONSIDERATIONS

While the Fund invests primarily in securities of the U.S. government and its agencies, the Fund's value is not guaranteed by these entities.

The Fund may purchase securities in derivatives, which can be very volatile and carry high transaction costs.

The Fund may purchase mortgage-backed and asset-backed securities, which are sensitive to fluctuations in interest rates. In addition, these securities are subject to prepayment, which may cause the Fund to reinvest in securities with lower interest rates.

**PERFORMANCE SHOWN REPRESENTS PAST PERFORMANCE AND DOES NOT GUARANTEE FUTURE RESULTS.** Current performance may be higher or lower than the performance shown. The investment return and principal value of an investment will fluctuate, so that an investor's shares, when redeemed, may be worth more or less than their original cost. To obtain performance information current to the most recent month-end, which may be higher or lower than the performance shown, please call 1-800-848-0920 or go to [nationwidefunds.com](http://nationwidefunds.com).

**Class A shares have up to a 2.25% front-end sales charge and a 0.25% 12b-1 fee. Investors may be able to reduce or eliminate front-end sales charges on Class A shares, based on investment size. Please consult the Fund's prospectus for more details.**

Performance returns assume the reinvestment of all distributions. Returns for periods less than one year are not annualized. Total returns reflect a waiver of part of the Fund's fees for certain periods since inception, without which returns would have been lower.

## DEFINITIONS

**Merrill Lynch (ML) 6-Month Treasury Bill (T-Bill) Index:** comprises a single issue purchased at the beginning of a month and held for a full month. At the end of that month, that issue is sold and rolled into a newly selected issue. The issue selected at each month-end re-balancing is the outstanding T-Bill that matures closest to, but not beyond, six months from the re-balancing date. **Merrill Lynch 1-Year Treasury Bill Index:** comprises a single issue purchased at the beginning of a month and held for a full month. At the end of that month, that issue is sold and rolled into a newly selected issue. The issue selected at each month-end re-balancing is the outstanding T-Bill with the longest maturity. **Average annual total returns** are the annual compounded returns that would have produced the cumulative total return if Fund performance had been constant during the given period. **Duration** is an estimate of bond price sensitivity to changes in interest rates. The higher the duration, the greater the change (i.e., higher risk) in relation to interest-rate movements. **Standard deviation** is a statistical measure of risk. It reflects the extent to which an asset's rate of return may fluctuate from period to period.
